VGM-info

## VGM weighing

- The containers will be weighed on shipper's request. The shipper or a person authorised by the shipper can request Euroports to weight the container.
- Weighing request has to be submitted by using updated terminal advice. Updated terminal advice is available on our website. VGM information is not required for containers to be loaded on board before 1<sup>st</sup> of July 2016.
- Weighing information will be sent to e-mail address (max. 3 addresses) of VGM info recipient submitted in terminal advice.
- The shipper is responsible for forwarding the data to the ship's master or ship's master or his representative.

## Delivering export container to the port

- If container already has VGM: VGM is inserted to terminal advice (field 4.d) Please note! Cargo gross weight and container tare weight are required as well.
- If VGM is not yet known: Weighing request can be submitted by terminal advice. Please fill in 'VGM weighing required at port' fields A. and B. In this case field 4.d is left blank.
- If container arrives at the terminal without VGM information or weighing request, container will be accepted to the terminal to wait for further instructions from the customer.
